

## Extension of V2 By-Product reports validity

As part of the measures to ensure a smooth transition process to MarinTrust Standard V3, whilst protecting the integrity of the Programme, a variation has been granted against clause 9.9 (PRO-003), to extend the validity of V2 By-Product reports listed in Table 1 below.

The extension applies **only** to:

- V2 By-product species and areas listed herein
- MarinTrust certified facilities undergoing a V2 Facility audit between January 1<sup>st</sup> to May 1<sup>st</sup>, 2025

All currently approved by-products under V2 will undergo a V3 By-Product assessments this year, however, these may take place after their V2 audit. This variation agreed upon by MarinTrust and Certification Bodies ensures there are no gaps in the records or validity of approved V2 By-products during the transition. After May 1<sup>st</sup>, all facility audits will be under V3.

**This variation does not apply for facilities undergoing a V3 audit.**

Facilities undergoing V3 audits **must** have an initial V3 By-product assessment for all species in its scope conducted prior to the audit. V3 by-product assessment outcomes will supersede previous assessment outcomes under V2.

### **Additional notes for Auditors:**

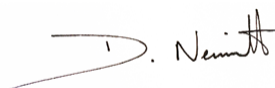

During V2 Facility audits taking place before May 1<sup>st</sup>, 2025, auditors must verify against V2 By-Product Raw material assessments at audit, **not** V3 By-Product assessments. No by-products will be assessed against V2 in 2025, though at audit, some V2 by-products may have passed their validity date, which is why this variation is in place.

To confirm this extended validity for individual By-Product reports, auditors shall consult the list in Table 1 below. As this is a live document, auditors should take care to review the list at the time of audit and take note of the last updated information.

If any questions should arise on individual validities, please contact [Fisheries@marin-trust.com](mailto:Fisheries@marin-trust.com).

**Francisco Aldon**  
CEO, MarinTrust

**Dale Newitt**  
DIRECTOR, SCFS - Seafood

**Megan Mclaughlin**  
Senior fisheries technical officer
